EE371

Compact Dew Point Sensor

The EE371 is dedicated for accurate and reliable monitoring of the dew point temperature (T_d) in the range $-60...+60\text{ }^{\circ}\text{C}$ T_d ($-76...140\text{ }^{\circ}\text{F}$ T_d), with pressure rating up to 100 bar (1450 psi). It is ideal for compressed air systems and industrial process control. Besides T_d , the device measures also frost point temperature (T_f) or volume concentration (W_v).

High Accuracy

The innovative, monolithic E+E HMC200 humidity and temperature sensing element together with a sophisticated auto-calibration procedure leads to an accuracy better than $\pm 2\text{ }^{\circ}\text{C}$ T_d ($\pm 3.6\text{ }^{\circ}\text{F}$ T_d) and excellent long term stability.

Analog Outputs and Display

The measured data is available on two freely configurable voltage or current outputs as well as on the LCD display.

Functional Design

The compact, robust metal enclosure, the swirling front-end and various process connections and sampling options allow for easy and comfortable design-in, mounting and operation.

Easy Configuration

An optional adapter and the free EE-PCS Product Configuration Software facilitate easy configuration and adjustment of the EE371.
