# EE75

## Highly Accurate Air/Gas Velocity Sensor for Industrial Applications

The EE75 air velocity (v) and temperature (T) sensor is optimized for best measurement results in challenging air flow applications in most various industries.

### Outstanding Measurement Performance

With its multipoint v factory adjustment the EE75 meets the highest accuracy requirements. The E+E thin-film sensing element employed operates on the hot-film anemometer principle, which stands for excellent accuracy from 0.06 m/s (12 ft/min) up to 40 m/s (8000 ft/min) and low angular dependency. The integrated temperature compensation combined with the robust mechanical design, makes the EE75 suitable for process temperatures from -40 °C (-40 °F) up to 120 °C (248 °F).

### Versatility

The EE75 is available for duct mount as well as with remote probe in various probe lengths. The remote probe types feature different cable lengths and pressure tight versions up to 10 bar (145 psi). The IP65/NEMA 4 rated metal enclosure facilitates easy installation and maintenance. The v and T measured data is available on two current or voltage analogue outputs. In addition to v and T values EE75 calculates the volume flow  $V'$  in m<sup>3</sup>/min or ft<sup>3</sup>/min.

### Configurable and Adjustable

The setup and adjustment of the EE75 can be easily performed using the configuration software and USB interface cable included in the scope of supply.

EE75 for duct mount

EE75 with remote probe

EE75 with remote probe, pressure-tight up to 10 bar (145 psi)

# Features

## EE75 Sensor

- Highly accurate over the entire working range
- Combined v and T measurement
- Integrated T compensation
- Optional display with backlight and menu buttons
- Easy mounting and maintenance
- Voltage or current output, selectable
- Low-flow suppression
- Calculation of volume flow V'

## EE75 Sensing Head and Probe

- Measuring range from -40 °C (-40 °F) up to 120 °C (248 °F) and 10 bar (145 psi)
- Accurate measurement of air flows from 0.06 m/s up to 40 m/s (12...8000 ft/min)
- Low angular dependency
- Long-term stable

## Application Specific Design

- Duct mount and remote probe types with different probe lengths
- Pressure tight remote probes up to 10 bar (145 psi)
- Various cable lengths for remote probe types
- Process connection with stainless steel flange or G 1/2" ISO / 1/2" NPT thread

## Adjustment and Configuration

- v and T adjustment
- Scalable measuring range
- Selectable output signal
- Response time
- Calculation of volume flow

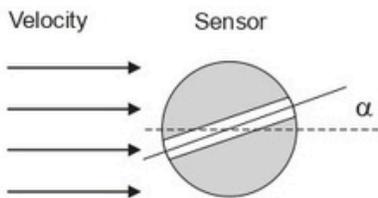

## Inspection Certificate

according to DIN EN 10204-3.1 with three v points

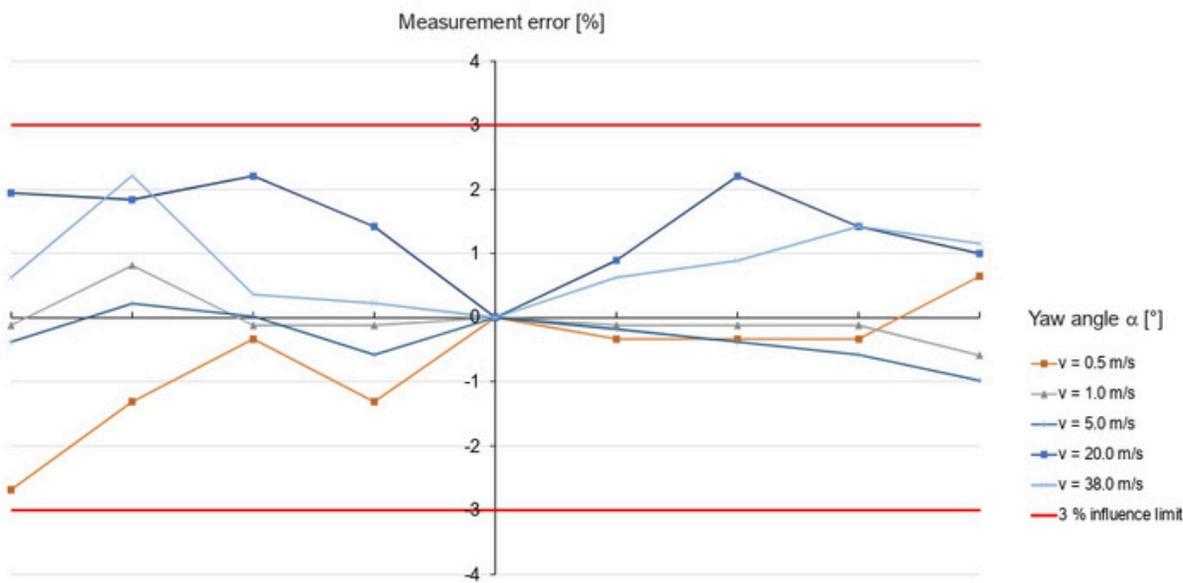

# Features

## Angular Dependency

The innovative design of the probe head minimises the effect of the angle of inflow (yaw angle) on the measuring result. The deviation of the measuring value remains <3% up to a yaw angle  $\alpha$  of  $\pm 20^\circ$  between the direction of inflow and the sensor element's longitudinal axis.

EE75 sensing head in the flow

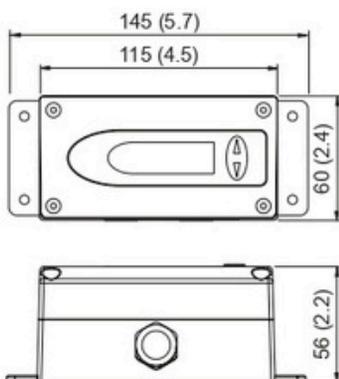

Measurement error over yaw angle for different velocities

# Dimensions

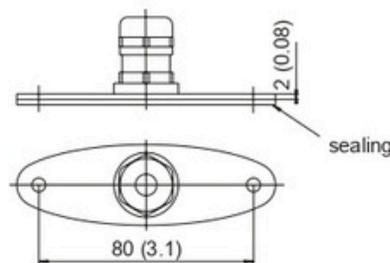

Values in mm (inch)

## Enclosure

## Mounting flange

for Types T2 and T3 (included in the scope of supply)

# Technical Data

## Measurands

### Temperature (T)

Measuring range	-40...+120 °C		
Accuracy in air at 25 °C (77 °F) at air flows $\geq 0.45$ m/s (886 ft/min)	$\pm 0.5$ °C ( $\pm 0.9$ °F)		
Temperature dependency of electronics, typ.	$\pm 0.005$ % of mv/K deviating from 25 °C (77 °F)	mv = measured value	
Temperature dependency of probe, typ.	$\pm 0.1$ % of mv/K deviating from 25 °C (77 °F)	mv = measured value	
Response time $t_{90}$ , typ.	$\leq 10$ s		

## Outputs

### Analogue

Two freely selectable and scalable outputs for v, T, V'	0 - 10 V 0 - 20 mA / 4 - 20 mA (3-wire)	-1 mA < $I_L$ < 1 mA $R_L \leq 350 \Omega$	$I_L$ = load current $R_L$ = load resistance
--	--	---	---

## General

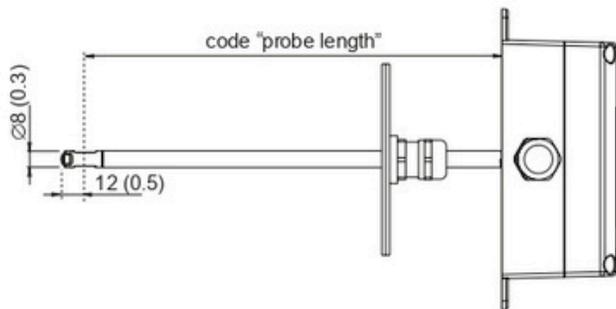

Power supply class III  USA & Canada: Class 2 supply necessary	24 V DC $\pm 20$ %		
Current consumption, typ. With Display	<100 mA <160 mA		
Electrical connection	Screw terminals max. 2.5 mm <sup>2</sup> (AWG 16)		
Protection rating	IP65/NEMA 4		
Temperature working range	Probe cable Enclosure Enclosure with display	-40...+105 °C (-40...+221 °F) -40...+60 °C (-40...+140 °F) -30...+60 °C (-22...+140 °F)	
Pressure working range	T2, T3: T26:	700...1 300 hPa (10.2...18.9 psi) Pressure tight 0.05...10 bar (0.73...145 psi)	
Humidity working range	0...95 %RH, non-condensing		
Storage conditions	-20...+70 °C 0...95 %rF, non-condensing		
Material	Enclosure Probe Probe head	Die-cast aluminium (AlSi9Cu3) Stainless steel 1.4404 Polybutylenterephthalat (PBT)	
Electromagnetic compatibility	EN 61326-1 FCC Part15 Class B	EN 61326-2-3 ICES-003 Class B	Industrial Environment
Configuration und adjustment	<a href="#">EE75 Configuration Software</a> and USB interface cable included in the scope of supply		
Conformity
